Target Group

This seminar is aimed at those responsible in the areas of quality assurance and quality control in the pharmaceutical industry who use AI applications in their areas or decide on their use.

Objectives

In this seminar, you will learn about the possibilities of using artificial intelligence in the areas of quality assurance and quality control in the pharmaceutical Industry.

You will learn

- How GPT can be used for daily work with GMP documents
- How processes can be automated with the help of AI and digital tools

Programme

Use of AI in the GxP Environment from a GMP Inspector's Perspective

- EU GMP Guideline Annex 11
- Concept Paper Revision of Annex 11
- EMA Reflection paper on the use of Artificial Intelligence (AI)
- Guidelines from the pharmaceutical world
- Inspection practice

Use of AI in the GxP Environment - what is Required to Generate the Necessary Trustworthiness

- Potentials and challenges in the use of AI in the pharmaceutical industry
- Current laws and guidelines on AI
- Some important AI terms and concepts
- Data are the true indicators of Performance
- What roles do humans play and what roles are required?
- From the use case to the right AI system: validation of AI application using a life cycle

Further Information

Technical Requirements
